

# Agile Project Management - Module 2: Kicking Off your Agile Project

As organisations are required to quickly respond to a rapidly changing environment, it has never been more important to deliver projects effectively. Module 2 of the MCI Agile Project Management Course enables organisations and individuals to get Agile projects on track early, reduce project risk, and build a foundation for the delivery of their products.

## Snapshot

Duration: 90 minutes

Level: Intermediate

Pre-requisites: Participants will need a basic understanding of Project Management, and we do recommend attending our Project Management series, however this is not a requirement.

## Learning Outcomes

- Managing the environment of your projects to increase support for agile projects
- Developing an Agile Business Case and MVP (Minimum Viable Product)
- Designing the objectives for agile projects
- Structuring the key roles required to deliver the project
- Incorporating the product backlog and developing the sprint backlog

## Course Outline

- Reflection on the emotions associated with kicking off a project
- Facilitated discussion of the Agilometer and its application
- Practical development of scope for the agile project
- Interactive development of the business case for an agile project
- Hands on engagement in managing agile project initiation
